

## High Availability & Disaster Recovery in the Cloud: Guaranteed Business Continuity

Long View Systems, recently ranked second on the MSPmentor 100, is a leading service provider and trusted partner that can keep your business running uninterrupted during a system failure.

### High Availability & Disaster Recovery Services From Long View Systems

All too easily, system failures and their resulting downtime can lead to significant losses of critical business data and potential revenue. With Long View, you can eliminate the financial and operational risks of failure by running a zero-downtime information technology environment. Long View's High Availability & Disaster Recovery solutions ensure the security and availability of your business-critical applications by replicating your system environment in a world-class data center facility. In the event of a system interruption or failure, the replica engages automatically and seamlessly, providing continued access to your applications and data.

Our industry-leading Disaster Recovery solutions require no capital investment and can be deployed quickly and easily, allowing you to manage your operating costs and IT resources more efficiently while decreasing risk. Zero-downtime empowers you to provide your customers with high quality, uninterrupted service.

## How Does Disaster Recovery Work in the Cloud?

Explained simply, Long View would set up mirror servers at a remote data center location boasting high-security, redundancy, and protection from natural disasters. Whenever a change is made to in your environment, that change is immediately and securely replicated to our mirror servers at the remote site, thus maintaining an exact replica of your applications and data. In the event of a disruption of service or failure, our systems will automatically redirect all running processes over to the remote environment.

The net result is that business can continue as normal during a failure and, once the problem has been resolved, the processes are switched back. High Availability & Disaster Recovery solutions from Long View Systems ensure constant protection of and access to your business applications and data.
