

Web Protection

Web Protection in the Cloud: Safeguarding Your Business

For many organizations, Internet access plays a crucial role in day-to-day business. Left unchecked, however, Web use can wreak havoc in your company. Online threats grow increasingly malicious, and when combined with email threats (e.g. phishing attacks), the potential effects can be devastating to your users, your network, your reputation, and your finances. Due to a lack of proper safeguards, an unassuming click could expose your business to a range of threats including: viruses, data loss due to spyware, and a host of other issues that can result in hours of lost productivity. Long View Systems' Web Protection solution can help your business tap into the power and efficiency of the Internet, while keeping internal and external threats at bay.

Combining industry-leading protection with powerful administrative capabilities delivered on a SaaS platform, Web Protection solutions from Long View are your comprehensive Internet security solution. This fully managed service requires no hardware or software integration, no capital costs, and offers unmatched usability and the following key features:

- Protects businesses from unproductive Web use
- Protects against a wide-range of Web-based malware using proactive category filters and scanning
- Protects against workplace claims and aids in regulatory compliance
- Provides detailed visibility into Web use
- Threat, content, and usage reports provide visibility into corporate Web traffic trends
- Customizable group policy support
- Roaming user support provides protection from infections brought in by laptops
- Multiple authentication mechanisms

The Long View Approach to Web Protection in the Cloud

Whether your organization is looking to strengthen its defence against Web threats or to gain greater insight and control over non-business related Internet use, or both, Long View's Web Protection service is designed to meet your needs. Our proven technologies provide you with a reliable Web Protection solution that works and can be deployed quickly and easily. Is your IT staff and budget overextended? Are you paying for single point solutions that you aren't using efficiently? Our solutions free up your valuable in-house IT resources for productive use in core revenue generating activities.

Designed to offer enterprise-grade performance, without the accompanying complexity and cost, Long View's Web Protection solution can help your business:

- Conserve network bandwidth
- Eliminate the purchase and maintenance of additional hardware or software
- Reduce wasted IT and employee time and productivity
- Reduce costs and IT aggravation associated with malware-infected PCs including clean-up and replacement

LVS Web Protection Provides

- Greater employee productivity by eliminating unauthorized Internet usage
- Advanced protection that reduces liabilities associated with compliance breaches
- More time for your IT staff to focus on core projects because the service helps reduce time consuming PC clean-up and maintenance
- Increased network bandwidth availability and less data bottlenecks
